

Ready-mixed concrete control system

The control system was designed for a 2 cbm concrete mixing plant with the following specifications:

- Aggregate weigher for 5 components
- Lift with bucket conveyor 3000 lit.
- Mixer 2 cbm
- Equivalent water weigher, cement weigher and admixture weigher
- Control for cement injection including filter units

The system already contains the following components:

- Dosing system with operating modes, manual and automatic operation
- Autonomous, remotely parameterisable SpS sequence control
- Calibratable scale displays, weighing amplifier
- Free programmable plant configuration
- Process visualisation of all sequences
- Order processing, Master data and recipe management
- Goods receipt
- Fill level displays
- Consistency and moisture measurement
- Actual w/c value measurement in the mixer
- Delivery note and protocol printout (editable)
- Data backup (external, internal)
- Remote diagnosis

SPECIFIC COMMENTS

- Solid construction
- Including industrial computer
- Screens
- Protocol printer
- Technically flawless
